To learn more about any of the following services, contact the mental health coordinator listed on the website of the county that interests you. General information is also available from the state employee listed below.

Comprehensive Community Services programs (**CCS**) provide a flexible array of individualized community based psychosocial rehabilitation services and supports to children, adolescents and adults with mental health or substance use disorders. CCS programs use a wraparound model that is flexible, consumer directed, recovery oriented and strength-based. Additional information can be obtained by contacting Cheryl Lofton at [cheryl.lofton@wisconsin.gov](mailto:cheryl.lofton@wisconsin.gov).

Community Support Programs (**CSP**) provide a range of treatment, rehabilitation, and support services through a treatment program and staffing developed to ensure ongoing therapeutic involvement and individualized treatment for adults with severe and persistent mental disorders. Adolescents who are eligible based on diagnosis and functional deficits might also be served. Additional information can be obtained by contacting Brad Munger at [brad.munger@wisconsin.gov](mailto:brad.munger@wisconsin.gov).

Coordinated Services Teams (**CST**) and Integrated Services Projects (ISP) use a wraparound process to respond to individuals and families with multiple and often serious needs in the least restrictive setting possible. This wraparound process is based on family and community values, is unconditional in its commitment to creatively address needs, and supports community-based options. Each child and family-centered team develops an individualized plan, incorporating the strengths of the child, family, and team members to work toward identified goals. Parents/care givers are equal partners and have ultimate ownership of their Plan of Care. Additional information can be obtained by contacting Mai Vue Zong at [maizong2.vue@wisconsin.gov](mailto:maizong2.vue@wisconsin.gov) or Rebecca Wigg-Ninham at [rebecca.wigg-ninham@wisconsin.gov](mailto:rebecca.wigg-ninham@wisconsin.gov).

Community Recovery Services programs (**CRS**) provides three specific services to adolescents and adults with significant mental health disorders. The services available to eligible individuals include: community living supportive services, supported employment, and peer support services. Additional information can be obtained by contacting Kay Cram at [kay.cram@wisconsin.gov](mailto:kay.cram@wisconsin.gov).

The Healthy Transition Initiative (**HTI**) is a federal grant to promote better transitions for adolescents into adulthood. Often, additional assistance at this stage of life enables the young person to focus on his/her strengths while identifying life goals and working towards them. For more information about resources and how to be supportive of a young person experiencing mental health challenges, contact the HTI Project director, Sally Raschick, at [sally.raschick@wisconsin.gov](mailto:sally.raschick@wisconsin.gov).
